

ZIPSCREEN THE ULTIMATE OUTDOOR SCREENING

COVERED ZIPSCREEN IS THE ULTIMATE EXTERNAL SCREENING SOLUTION FOR ANY OUTDOOR AREA OR WINDOW

Protection and privacy throughout the entire year. ZIPSCREEN offers you protection from the elements whilst also keeping out those pesky bugs regardless of the season. Whether it be on a Pergola, Veranda or Alfresco area, COVERED ZIPSCREEN is the ideal addition for any outdoor entertaining area.

Additionally perfect for home or office windows, ZIPSCREEN compliments almost all facades being a straight, strong extruded design in contrast to conventional roller shades or shutters.

The ZIPSCREENS clever design allows for seamless integration into your home with fixing options either face fix or top fix and the unique design of the side tracks allows for out of square openings ensuring your installation is a breeze.

The ZIPSCREENS can be made in widths up to the 5.8 metres with the standard headbox or a noteworthy 7.0 metres with the ZIPSCREEN EXTREME, offering you a practical solution for all your needs.

KEEP YOUR HOME COOL IN SUMMER AND WARM IN WINTER

Reduce your energy bills in Summer by keeping the direct sun off your windows. Heat gain through glass is one of the leading causes of energy consumption as for every square metre of glass exposed to the sun's harmful rays the equivalent of 1000W of heat energy enters your premises.

Adding a ZIPSCREEN can take care of this issue by blocking 90% of that heat from entering your home Assisting to create a much more energy efficient environment.

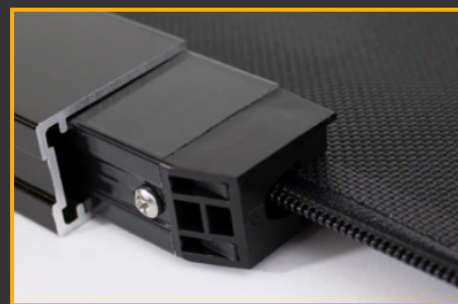

Having full control of your ZIPSCREEN blind allows you to let light and warmth in during the cooler months but also provide shade protection during summer. Winter entertaining can be within your reach again with ZIPSCREEN as keeping in warm air generated through heaters can be trapped and cool winds kept out.

When placed around an outdoor alfresco area you are expanding your living space and creating an environment protected from insects, inclement weather and also saving your outdoor furniture from destructive UV rays.

A truly versatile product where summer and winter are both catered for the COVERED range of ZIPSCREEN Outdoor Blinds are an asset all year round.

ZIPSCREEN™ HIDDEN Z-LOCK™ TECHNOLOGY

The unique Z-LOCK technology guarantees there are no gaps between the fabrics and the channels allowing smooth operation of your awnings which won't damage the fabric or allow it to blow out with the breeze.

TECHNOLOGY

Covered ZipScreen offer 3 different ways to control your awnings needs, from spring loaded, gearbox-crank hand held or you can look at motorising your Covered ZipScreen where you can take full advantage of current technology available today.

AUTOMATION

When you link your Covered ZipScreens to the ACMEDA Automate Pulse Hub you can control your awnings anywhere around the home or office. The smart phone app lets you set automatic timers for your Covered ZipScreens.

VOICE CONTROL

Covered ZipScreen automate motorised awnings can be voice controlled with Google Home, Amazon Alexa or Apple Home Pod apps. Make the most of your fully automated home.

OPERATION TYPES 6

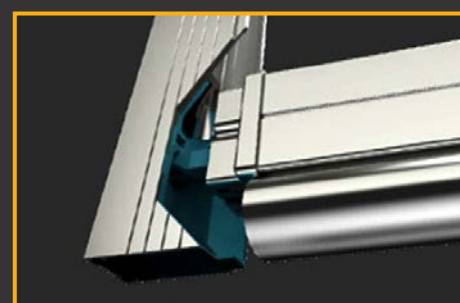

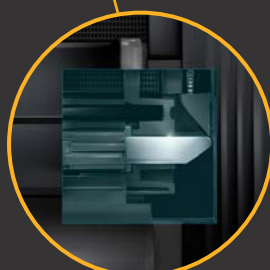

Covered Rubber Seal helps create a great weather seal protecting your outdoor areas. It also gives you a 20mm tolerance allowing for a fall of the ground, still allowing a good weather seal.

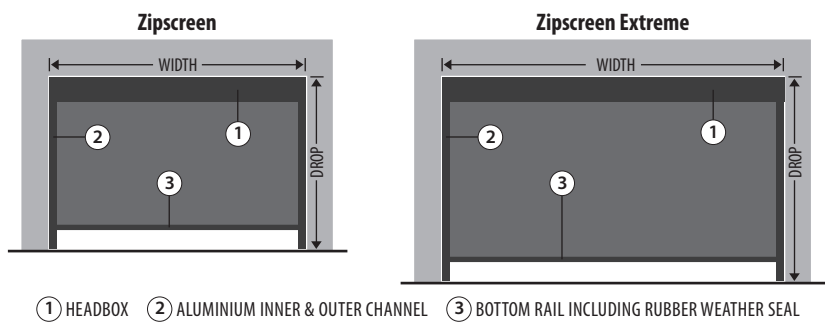

Covered brings an extensive fabric selection not just in textures and colours readily available. Most fabrics have a 5-10 Year Warranty. Mesh fabrics still allow for air flow and circulation whilst protecting you from various insects and inclement weather.

ONE ACTION ULTRA-LOCK & TENSION

The patented Ultra-Lock system, closes, locks and tensions the Zipscreen in one simple movement keeping your fabric taut and secure.
