ALPHA RETRACTABLE ROOF SYSTEMS

COVERED | IDEA-FL ROOF SYSTEMS

The **IDEA-FL** is a modern elegant and ergonomic pergola roof system that stands out for its arched shape of the roof making it ideal for architectural structures.

It can be installed with a built-in gutter (**IDEA-FL Uniq**) which allows the rain-water to flow out through the aluminium columns that support the front beam. The system can be installed in various configurations such as on an existing structure (**IDEA-FL Q**) or with hanging rods (**IDEA-FL Air**) making it extremely versatile.

The **IDEA-FL** protects perfectly from adverse weather conditions with the whole structure made entirely of high grade 6061 aluminium whilst the

INOX fittings and bolts add a further level of excellence. Available with side guides of total external dimensions 130mm x 65mm and with columns of total external dimensions 130mm x 65mm or 130mm x 130mm the maximum covered surface with one-piece cloth is an impressive 13m x 6m, depending on the type of installation chosen.

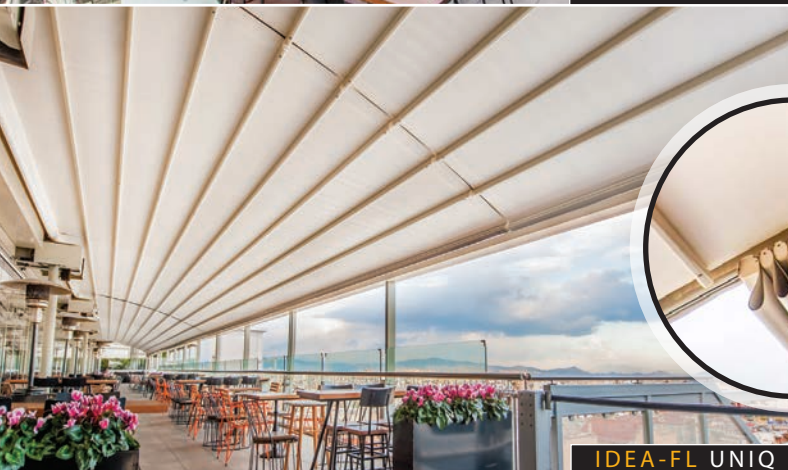

Ask your sales representative for Fabric samples and colours available as well as explore the range of optional extra's that will assist in making your outdoor area a welcome retreat.

COVERED | ZERRO° ROOF SYSTEMS

The Covered **ZERRO°** range is our most versatile roof system once again offering an elegant finish whilst providing an extensive range of fitting options. The built-in gutter option directs the flow of rainwater through the aluminium columns that support the front facade. The **ZERRO°** system can be installed in a number of different ways starting with the most popular aluminium beam and columns (**ZERRO° Uniq**), using hanging rods with support back to a wall or support column (**ZERRO° Q-Air**), between two walls (**ZERRO° Mezzo**) or an additional set of rear posts and supporting columns making this a stand alone system (**ZERRO° FS**) making it extremely versatile.

WHY THE NEW BRAND

The **COVERED** brand has embraced a wide range of quality products both new and old for the Window Covering industry. The **COVERED** philosophy is simple...to deliver the very latest Australian and European systems and textiles incorporating state-of-the-art technology to ensure all of our products will stand the test of time...keeping you **COVERED** Day and Night.

The Covered **IDEA-FL** is a modern eye turner with the arch shape of the roof bringing a unique difference to architectural structures. It can be installed with a built in extruded structural gutter (**IDEA-FL Uniq**) to collect the rainwater whilst draining through the columns/posts that support the front beam or gutter. The system can also be installed in different ways, either on an existing structure (**IDEA-FL Q**) or hanging on cantilevered rods (**IDEA-FL Air**) making it extremely versatile. The quality of the construction is obvious, while the whole structure frame is entirely made of aluminum and stainless-steel components.

The Covered **ZERRO** Retractable Roof System is a modern innovative and ergonomic pergola. This system stands out for its simple lines and clean surfaces and is our flagship model with the most features and versatility. With a built-in extruded gutter to collect the rainwater whilst draining through the posts that support the front facade the design will keep the rain out in most weather conditions. Installation options for the **ZERRO** are numerous and range from an front beam and columns (**ZERRO-Uniq**) to a cantilevered rod (**ZERRO-Q Air**) making it an extremely versatile system. The all aluminium and Stainless construction and large range of membrane coverings available this versatile range will have you covered.

The Covered **GRANDE** is an extremely robust, heavy duty, yet elegant model. The **GRANDE** is our upscaled model and was designed for large areas, like restaurants, cafés, resorts, hotels and residential alfresco areas. It has a built in extruded structural gutter to collect the rainwater whilst draining through the columns. The System comes in a couple of different styles, with the the aluminium beam and columns (**GRANDE UNIQ**) being the traditional roof template or between 2 walls and removing the requirement for posts creating the (**GRANDE MEZZO**). The rafters are made from extruded 190mm x 90mm with columns/posts being 130mm x 130mm making the maximum size of this system using one piece of fabric 13 metres in width and 10 metres projection.
